-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. **Claims 1-24**, drawn to a control message separate from a data message in a frame where CSI information is obtained from the control message, classified in class 370, subclass 445.
 - II. **Claims 25-27**, drawn to measuring the channel state information between network entities and then adjusting the guard interval based on the CSI, classified in class 370, subclass 208.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the guard interval is sent from the CSI where the CSI could be obtained from a polling frame that may contain data (i.e., not a data only frame as disclosed by applicant for Invention I). The subcombination has separate utility such as a data only frame. In addition, the frame layout (i.e., data signal and training sequences) recited for Invention II may not be required for Invention I.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. During a telephone conversation with Gerald Stanton on 9/14/2004 a provisional election was made without traverse to prosecute the invention of group I, **claims 1-24**. Affirmation of this election must be made by applicant in replying to this Office action. **Claims 25-27** are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. **Claims 13 and 16** are rejected under 35 U.S.C. 102(e) as being anticipated by U.S.

Patent Application US 2004/0151146 A1 to *Hammerschmidt*.

As to **claim 13**, see figure 15 where figure 15 is for a contention free period and a poll is CF-Poll, a Short InterFrame Space (SIFS) is ACK 1504, and a data message is DATA 1506.

As to **claim 16**, no CSI measurement is required for figure 15.

Allowable Subject Matter

3. **Claims 1-12, and 22-24** allowed.

Art Unit: 2663

4. **Claims 14, 15, and 17-21** are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Derrick W. Ferris whose telephone number is (571) 272-3123. The examiner can normally be reached on M-F 9 A.M. - 4:30 P.M. E.S.T.
